Managing Your NovaTech Account

NovaTech Solutions Inc. — Customer Support Knowledge Base

v1.0 | 2025 | Internal Use

Account Setup & Access

Q: How do I create a NovaTech account?

Visit app.novatech.io/signup and complete the registration form with your work email, company name, and desired subdomain (e.g., yourcompany.novatech.io). A verification email will be sent within 2 minutes. After verification your workspace is provisioned automatically. For SSO-provisioned organisations, contact your IT admin to add your user to the NovaTech identity provider group.

Q: What are the password requirements?

Passwords must be at least 12 characters and include uppercase, lowercase, a digit, and a special character (!@#\$%^&*). Passwords expire every 90 days unless your admin has disabled rotation policy. NovaTech recommends using a password manager and enabling MFA.

Q: How do I enable Multi-Factor Authentication (MFA)?

Navigate to Settings > Security > MFA and choose your preferred method: Authenticator App (TOTP - recommended), SMS, or Hardware Security Key (FIDO2/WebAuthn). Enterprise admins can enforce MFA org-wide from the Admin Console > Security Policies.

Q: I forgot my password. How do I reset it?

Click 'Forgot Password' on the login page and enter your registered email. A reset link valid for 15 minutes will be sent. If you don't receive it within 5 minutes, check your spam folder or contact support. Admins can force a password reset for any user from Admin Console > Users.

Q: Can I have multiple accounts with the same email?

No. Each email address is tied to one NovaTech identity. If you need access to multiple organisations (e.g., a consultant working across clients), use the Multi-Org Switching feature available from your profile menu — no separate logins are needed.

User Roles & Permissions

Role	Description	Admin Console?
Owner	Full access; billing control; can delete org	Yes
Admin	Manage users, policies, integrations	Yes
Manager	Manage team members; view reports	No
Member	Standard access to assigned modules	No
Viewer	Read-only access to dashboards	No
API Service	Machine-to-machine, no login	No

Q: How do I invite new users?

Go to Admin Console > Users > Invite Users. Enter email addresses (one per line or CSV upload), assign a role, select modules, and click Send Invite. Invitations expire after 7 days. Pending invites can be resent from the Users list.

Q: How do I remove a user from my organisation?

Navigate to Admin Console > Users, find the user, and click Deactivate. The user is immediately logged out and loses access. Their data and audit history are retained for 90 days before permanent deletion (configurable by Admins). Deactivated seats are freed for reassignment immediately.

Q: Can I set custom permission sets beyond the default roles?

Yes. Enterprise and Platinum plans support Custom Role Builder (Admin Console > Roles > Create Custom Role). You can granularly toggle 80+ permissions per module. Custom roles can be based on existing roles as templates.

Q: How do I transfer account ownership?

Only the current Owner can transfer ownership. Go to Settings > Organisation > Transfer Ownership, search for the target user (must be an existing Admin), and confirm with your current password and MFA. The transfer is logged in the Security Audit Trail.

Billing & Subscription Management

Q: Where can I view my invoices?

All invoices are accessible in Settings > Billing > Invoice History. Invoices are in PDF format and include line items for each module, seat count, and applicable taxes. They are also emailed to the billing contact on the day of issuance.

Q: How do I update my payment method?

Go to Settings > Billing > Payment Methods. Add a new card or bank account, set it as default, and the change takes effect immediately for the next billing cycle. Old payment methods can be removed once a default is set.

Q: How do I upgrade or downgrade my plan?

Plan changes are managed from Settings > Billing > Change Plan. Upgrades take effect immediately with pro-rata billing for the remainder of the cycle. Downgrades take effect at the start of the next billing cycle. Some feature access may change immediately on downgrade.

Q: How do I add or remove seats?

Navigate to Settings > Billing > Manage Seats. Adding seats bills the pro-rata amount immediately. Removing seats takes effect at the next renewal date. Minimum seat counts per plan tier apply.
