

NovaSuite User Manual

Getting Started & Core Feature Guide — Release 4.8

NovaTech Solutions Inc. — Customer Support Knowledge Base

v4.8 | 2025 | Internal Use

Table of Contents

1. Platform Overview
2. Navigation & Interface
3. Dashboard & Widgets
4. NovaCore CRM — Contacts & Deals
5. NovaOps ERP — Purchase Orders & Inventory
6. NovaPeople HR — Employee Profiles & Leave
7. NovaInsight Analytics — Reports & KPIs
8. NovaFlow Automation — Workflow Builder
9. Notifications & Alerts
10. Data Export & Import

1. Platform Overview

NovaSuite is a unified enterprise platform accessible via web browser (app.novatech.io), iOS app, and Android app. All data is synchronised in real time across devices. NovaSuite follows a workspace model: your organisation has a dedicated subdomain (e.g., acme.novatech.io) with isolated data storage.

System Requirements: Chrome 110+, Edge 110+, Firefox 115+, Safari 16+. Screen resolution 1280x768 minimum. JavaScript and cookies must be enabled.

2. Navigation & Interface

The NovaSuite interface consists of three zones:

- **Left Sidebar** — Module navigator, pinned favourites, and workspace switcher.
- **Top Bar** — Global search, notifications bell, quick-create (+) button, and profile menu.
- **Main Canvas** — Context-sensitive content area for the active module.

Keyboard Shortcuts

Shortcut	Action
Ctrl+K	Open global search
Ctrl+N	Create new record (context-sensitive)
Ctrl+S	Save current record
Ctrl+/ <td>Show all keyboard shortcuts</td>	Show all keyboard shortcuts
G then D	Go to Dashboard
G then C	Go to CRM
G then R	Go to Reports
Esc	Close modal / cancel action

3. Dashboard & Widgets

The Dashboard is your personalised command centre. It displays real-time data from all modules you have access to. Dashboards are per-user and can be shared.

Adding a Widget

- Click the **+ Add Widget** button in the top-right of the Dashboard.
- Browse or search the Widget Library (50+ widget types available).
- Select a widget and click **Configure** to set data source, filters, and date range.
- Click **Add to Dashboard**. Drag to reposition; drag the bottom-right corner to resize.

4. NovaCore CRM — Contacts & Deals

NovaCore CRM manages the entire customer lifecycle from lead capture to closed deal. Key entities: Contacts, Companies, Deals, and Activities.

Creating a Deal

- Go to CRM > Deals > **New Deal** (or press Ctrl+N from the Deals view).
- Enter Deal Name, Associated Contact/Company, Deal Value, and Expected Close Date.
- Select the Pipeline and Stage. Assign an Owner.
- Add relevant Tags, Custom Fields, and attach any files.
- Click **Save**. The deal appears in your Kanban board and list view.

5. NovaOps ERP — Purchase Orders & Inventory

NovaOps covers procurement, inventory management, supplier management, and financial reconciliation. It integrates with NovaCore CRM for quote-to-cash workflows.

Raising a Purchase Order

- Navigate to ERP > Procurement > **New Purchase Order**.
- Select a Supplier from your Vendor Master or create a new vendor inline.
- Add line items: product/service, quantity, unit cost, and tax code.
- Set the Delivery Date, Ship-To address, and Payment Terms.
- Submit for approval. Approvers receive an email and in-app notification.
- Once approved, the PO is sent to the supplier via email or EDI.

6. NovaPeople HR — Employee Profiles & Leave

NovaPeople centralises all HR operations: employee records, payroll integration, performance reviews, onboarding/offboarding, and leave management.

Submitting a Leave Request

- Go to HR > My Leave > **New Request**.
- Select Leave Type (Annual, Sick, Parental, Unpaid, etc.).
- Choose start and end dates. The system auto-calculates days based on your work schedule.
- Add a note (optional) and click **Submit**.
- Your manager is notified automatically. Track status in My Leave > Request History.

7. NovalInsight Analytics — Reports & KPIs

NovalInsight provides 100+ pre-built reports and a drag-and-drop Report Builder for custom analytics. Reports can be scheduled and distributed automatically.

Building a Custom Report

- Go to Analytics > Reports > **New Report**.
- Select a Data Source (CRM, ERP, HR, Finance, or cross-module).
- Drag fields into the Rows, Columns, and Measures areas.
- Apply Filters, Sorting, and Date Grouping.
- Choose a visualisation type: Table, Bar, Line, Pie, Heatmap, or Scatter.
- Save the report. Share with specific users or publish to a Dashboard.

8. NovaFlow Automation — Workflow Builder

NovaFlow enables no-code automation across all NovaSuite modules. Trigger actions based on record events, schedules, or external webhooks.

Creating a Workflow

- Go to Automation > Workflows > **New Workflow**.
- Name the workflow and select a Trigger (Record Created, Field Changed, Schedule, Webhook).
- Add Conditions to filter which records activate the workflow.
- Add Actions: Send Email, Create Task, Update Field, Call Webhook, Send Slack Message, etc.
- Enable the workflow and monitor runs in Automation > Run History.

9. Notifications & Alerts

NovaSuite delivers notifications via in-app bell, email, Slack, and Microsoft Teams. Manage your preferences in Settings > Notifications. Admins can configure org-wide notification rules for critical events (e.g., PO approvals above \$50,000).

10. Data Export & Import

Exporting Data

Any list view in NovaSuite can be exported via the **Export** button. Supported formats: CSV, XLSX, JSON, and PDF. Large exports (>50,000 rows) are queued and delivered by email when ready. Full data exports are available from Settings > Data > Export All.

Importing Data

- Download the import template from the relevant module (e.g., CRM > Contacts > Import > Download Template).
- Populate the template. Required fields are highlighted in orange.
- Upload the completed file. The importer will validate data and flag errors.
- Review the validation report, fix errors, and click **Confirm Import**.
- Imports run asynchronously. You receive an email summary on completion.
